2. Consolidation documents

The Company provided consolidation documents which included:

- financial statements of entities included in the consolidated financial statements,

Consolidation of the Capital Group's financial statements with regard to subsidiaries, was carried out using the full method by combining, in full amount, all relevant items of the financial statements of the Parent Company and subsidiaries, included in the consolidation.

An affiliate was included in consolidation under the equity method. Parent Company's share value in affiliate was corrected by increases or decreases of affiliate's share capital attributable to the Parent Company, which occurred during the period subject to consolidation and decreased by the amount of the dividends payable by the unit.
